

# CommuteApp

*We motivate people to move green*

CommuteApp is a Family-owned Danish company with the mission to “**Motivate People to Move Green**”. We deliver strong business cases, world class user friendliness and user-motivating technology. We are born global, act local, and are represented in six countries, both inside and outside of the EU.

No matter where you travel as a tourist or business traveler, you have to transport yourself in some capacity, be it from the airport and to a hotel, to meetings, or to other destinations. Many use a taxi, but there are common challenges and uncertainties when traveling in a foreign place

Am I getting the right price?

Am I getting the service I paid for?

Are they driving safely?

Does the driver drive the most optimal route, or am I being taken for a ride in a foreign place?

How can I pay for the ride, and can I get a receipt?

Can I communicate with them?

Does the driver know where the destination is?

Is the driver competent?

## Don't Worry!
